Kennel Mats

Our mats are made to fit standard plastic or wire crates and they come in 9 different sizes. Our design offers a warm fleece side and a cool quilted nylon side making the beds dual season. The kennel mats are filled with 22 ounces of polyester sheet batting that is stitched into place. This minimizes stuffing migration and allows the beds to be completely machine washer and dryer friendly, with no shrinkage. We use industrial 40 weight polyester thread in all of our products giving them maximum durability and longevity.
